## Constellium showcases its portfolio of advanced solutions maximizing the potential of aluminium at ALUMINIUM 2014

**Amsterdam, 7 October, 2014** – Constellium N.V. (NYSE and NYSE Euronext: CSTM) exhibits today at ALUMINIUM 2014 tradeshow its global portfolio of advanced solutions, maximizing the potential of aluminium for a broad range of applications. Constellium is leveraging its first-class R&D capabilities and competencies to meet high-level expectations of its customers, particularly in terms of weight, performance, formability and sustainability.

“ALUMINIUM 2014 trade show is the right place to showcase Constellium’s latest developments in a variety of applications. We are committed to continue working together with our customers and other strategic partners to develop advanced products that meet their existing and future needs,” said Bruno Chenal, Innovation and Technology Director at Constellium.

Constellium’s highlights at the tradeshow include:

- An extended portfolio of automotive solutions - from sheets for closures and structural components to Crash Management Systems - helping manufacturers produce lighter, safer and more fuel-efficient vehicles. For example, the Surfalex<sup>®</sup> family expands to match key customer specifications related to demanding skin quality.
- Kool X<sup>™</sup> is a new solution for demanding heat exchangers applications, such as water charge air coolers (CACs) and evaporators, providing an excellent combination of cladability, improved fatigue and corrosion resistance.
- GRIPSTER<sup>™</sup> is a new tread plate design offering an excellent combination of durability, grip and silence for use on commercial trucks. Vehicles equipped with this solution meet the requirements of PIEK, the certification scheme that certifies low noise vehicles in Europe.
- ALPLAN and UNIDAL<sup>®</sup> precision plate products improve machining efficiency and allow cost savings from 15 to 40%, depending on final part thickness and complexity. In addition, they contribute to reduce machining cycle time up to 50%, from mother plate to finished part.

- The breakthrough AIRWARE<sup>®</sup> technology suited to feature in all parts of the aircraft primary structure and offering a combination of unique benefits: up to 25% lighter, easier production of complex parts, and 100% recyclable without property loss.

Constellium is one of the nominees for the “9th EUROPEAN ALUMINIUM AWARD 2014 Industrial Design & Engineering” dedicated to products or projects in which aluminium has been applied in an innovative manner. Constellium’s project is focused on its 3D surfaces for the stylish decorative applications.

Innovating at Constellium also means contributing to a sustainable future. The company is committed to limit the environmental impact of its products throughout their entire life cycle. At the tradeshow, can recycling is on display at Constellium’s booth to illustrate the Group’s commitment in contributing to the reduction of environmental footprint in packaging. In the line with the recently announced partnership with Rexam and the growing conversion by beverage can makers from steel to aluminium, Constellium fully endorses the recycling rate target of 75 percent by 2015 set by the beverage can making industry for beverage cans in Europe and supports recycling awareness programs such as Every Can Counts<sup>®</sup>.

Achieving long-term sustainability also goes beyond the product. One of Constellium’s key objectives is to improve the sustainability of its operations and of the whole industry, while being fully transparent about the progress it achieves. Since 2012, Constellium has: joined the United Nations Global Compact (UNGC); been an active member of the Aluminium Stewardship Initiative (ASI); published its sustainability report participating in the Global Reporting Initiative (GRI), with clear objectives and progress made.

**Note to editors: Constellium’s exhibition will be open to visitors and the press in Booth 11E15.**

## **About Constellium**

Constellium is a global sector leader that develops innovative, value added aluminium products for a broad scope of markets and applications, including aerospace, automotive and packaging. Constellium generated €3.5 billion of revenue in 2013.

## **Forward Looking Statements**

Certain statements contained in this press release may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. This press release may contain

“forward looking statements” with respect to our business, results of operations and financial condition, and our expectations or beliefs concerning future events and conditions. You can identify forward-looking statements because they contain words such as, but not limited to, “believes,” “expects,” “may,” “should,” “approximately,” “anticipates,” “estimates,” “intends,” “plans,” “targets,” “likely,” “will,” “would,” “could” and similar expressions (or the negative of these terminologies or expressions). All forward-looking statements involve risks and uncertainties. Many risks and uncertainties are inherent in our industry and markets. Others are more specific to our business and operations. These risks and uncertainties include, but are not limited to those set forth under the heading “Risk Factors” in our Annual Report on Form 20-F, and as described from time to time in subsequent reports filed with the U.S. Securities and Exchange Commission. The occurrence of the events described and the achievement of the expected results depend on many events, some or all of which are not predictable or within our control. Consequently, actual results may differ materially from the forward-looking statements contained in this press release. We undertake no obligation to publicly update or revise any forward-looking statement as a result of new information, future events or otherwise, except as required by law.
